Lacre Evidence Report

generated 2026-11-08T16:20:20.096Z

VERIFIED / ANCHORED / AUTHORITY NOT IN YOUR TRUST LIST

VERIFIED / ANCHORED / AUTHORITY NOT IN YOUR TRUST LIST. All 3 receipts are internally consistent and correctly signed by the agent keys included in this bundle. They are dated 2026-10-27T16:28:00.135Z to 2026-10-27T16:28:01.000Z, as the agents recorded them. An external timestamp from 'C=US, O=DigiCert\, Inc., CN=DigiCert SHA256 RSA4096 Timestamp Responder 2026 1' proves the history through seq 2 existed, exactly as it is now, at 2026-10-27T16:28:05.000Z, 4 seconds after the last receipt it covers. Nothing at or before seq 2 can have been changed after 2026-10-27T16:28:05.000Z without detection. It does not show the record was unchanged before 2026-10-27T16:28:05.000Z: until then, whoever held the chain could have rewritten it, so compare 2026-10-27T16:28:05.000Z with the dates of the actions you are auditing. NOTE: 'C=US, O=DigiCert\, Inc., CN=DigiCert SHA256 RSA4096 Timestamp Responder 2026 1' is not in your trust list, so this does not yet establish who issued the timestamp. Get the authority's root certificate from the authority itself, pass it with --trust, and run the verifier again before relying on this.

Scope

Chain `e9642d14-d9ee-4b2c-9f76-11f2e07068f8`
Receipts 3
Positions `seq 0 through 2`
Receipts dated `2026-10-27T16:28:00.135Z to 2026-10-27T16:28:01.000Z`
Anchor time `2026-10-27T16:28:05.000Z`
Agents 1
Irreversible actions 3

External attestations

Position `seq 2`
Status `EVIDENCE only once you trust the authority`
Attested time `2026-10-27T16:28:05.000Z`
Authority `C=US, O=DigiCert\, Inc., CN=DigiCert SHA256 RSA4096 Timestamp Responder 2026 1`
Chain top `C=US, O=DigiCert Inc, OU=www.digicert.com, CN=DigiCert Trusted Root G4`
issued by `C=US, O=DigiCert Inc, OU=www.digicert.com, CN=DigiCert Assured ID Root CA`
fingerprint `33846b545a49c9be4903c60e01713c1bd4e4ef31ea65cd95d69e62794f30b941`
In your trust list `NO — confirm independently`
verified: 'C=US, O=DigiCert\, Inc., CN=DigiCert SHA256 RSA4096 Timestamp Responder 2026 1' attests this chain reached seq 2 at 2026-10-27T16:28:05.000Z (authority NOT in your trust list -- confirm you trust it)

Activity by action

refund.issue 3

How to verify this yourself

This PDF is a summary, not the evidence. It has no cryptographic value and anyone can edit it. The evidence is the JSON bundle this report was generated from. To check it independently, without trusting whoever operates this system and without a network connection, run the open-source Lacre verifier, lacre-verify (package @lacre/verifier), on that file:

```
lacre-verify bundle.json --trust <authority-root.pem>
```

<authority-root.pem> is the timestamp authority's root certificate, obtained from the authority itself and never taken from the bundle. For DigiCert it is DigiCert Trusted Root G4, which DigiCert publishes on its own site. To run the verifier from a source checkout, follow the steps in https://github.com/JaredKlopstein/lacre/blob/main/docs/getting-started.md. Someone technical you trust can run it for you; ask them for the full output.

The verifier is MIT licensed, makes no network connections, and shares no code with the software that produced this bundle. It re-derives every hash and re-checks every signature from the bundle contents alone.

What this does and does not establish

• It establishes that the receipts in the bundle are internally consistent and were signed by the agent public keys included in this bundle. Those keys come from the bundle itself: nothing here ties a key to a particular system, person or organization, so ask the producer to show you, separately, which system holds each key.
• It does not yet establish that the history is unaltered. A timestamp token is present and cryptographically sound, but the authority that signed it is not in your trust list, so nothing here rules out that the signer was chosen by whoever produced this bundle. Get the authority's root certificate from the authority itself and run the verifier again with --trust.

• It does not establish that the actions happened as recorded, or that every action was recorded. Receipts are what the agents chose to record about themselves.
• It does not make anyone compliant with any regulation. Lacre produces tamper-evident records that support logging obligations. This is not legal advice.
